

SMART KOPARGAON HACKATHON

Evaluator Handbook

A complete guide to the jury platform — navigation, evaluation workflow, scoring, and finalizing results.

For Jury Members & Evaluators

Smart Kopargaon Hackathon (SKH)

Hosted on the SKH digital platform · Sanjivani University

Prepared for the evaluation panel

★ READ FIRST — YOUR SELECTION QUOTA

From your 14 assigned teams, select exactly 7 to advance — mark 5 as Qualified (finalized) and 2 as Waitlist. The remaining 7 are Not Qualified.

Welcome, Evaluator

Thank you for lending your expertise to Smart Kopergaon Hackathon.

Smart Kopergaon Hackathon (SKH) is an innovation movement that brings together students, government, MSMEs, mentors, and industry experts to co-create solutions for real civic and industrial challenges. As a member of the jury, you assess the teams assigned to you, score them against a structured rubric, record your remarks, and set each team's qualification outcome.

This handbook covers everything you need: signing in, understanding your dashboard, reviewing team submissions, scoring fairly, and submitting your final evaluation. No technical background is required — the platform guides you at each step.

The Evaluation Flow — At a Glance

Follow these steps for every team assigned to you — your scores autosave as drafts along the way.

Repeat for each team

Return to your queue and pick the next team. Your

Progress

page tracks how many remain. You can save a draft and come back anytime — nothing is final until you click

Submit final

Round 2 Evaluation Criteria

Every submission is scored out of **100 marks** across the seven criteria below. Assess each criterion independently on its own merits, using the descriptions as your guide. On the review screen each criterion has its own slider and maximum.

#	Criterion	Marks	What to look for
1	Problem Understanding & Relevance	15	Clarity of the problem, target users and relevance to the given problem statement.
2	Innovation & Uniqueness	15	Originality, novelty and differentiation of the proposed solution.
3	Technical Feasibility & Prototype	20	Technical soundness, appropriate technology and functionality / progress of the prototype.
4	Impact & Effectiveness	15	Potential to create measurable social, economic, environmental or industrial impact.
5	Scalability & Sustainability	15	Potential for wider adoption, scalability and long-term sustainability.
6	User-Centricity & Usability	10	Ease of use, accessibility and alignment with the needs of intended users.
7	Completeness & Quality of Submission	10	Quality, clarity and completeness of documentation, supporting evidence and overall presentation.
TOTAL		100	Sum of all seven criteria

Highest weight — Technical Feasibility & Prototype (20 marks)

Give the working prototype and its demonstrated progress proportionate attention — it carries the most marks of any single criterion.

How the marks are applied

On the review screen you simply move each criterion's slider to the marks it deserves; the platform totals and normalizes the scores, so results stay fair across different problem statements.

1 Your Role & How Evaluation Works

Every jury member gets a **scoped workspace**. You only ever see the problem statements and teams that organizers assigned to you — there is no global directory, and nothing outside your scope is visible. This keeps evaluation focused and confidential.

Your responsibilities are simple:

- Review each assigned team's problem statement and submitted materials.
- Score the team against the official rubric using the on-screen sliders.
- Write remarks for the organizers and finalists.
- Set the team's outcome — Qualified Waitlist Not Qualified
- Submit your final evaluation.

Fair scoring across rubrics

Scores are automatically normalized (your total ÷ the rubric's maximum), so results stay fair even if different problem statements use slightly different rubrics. You just move the sliders — the platform handles the maths.

2 Getting Started — Signing In

1 Open your invitation email

Organizers send your login credentials (email + a temporary password) to your registered address. Keep this email handy.

2 Go to the SKH platform

Open the platform link from your invitation in any modern browser (Chrome, Edge, Safari), on desktop or mobile.

3 Log in with your credentials

Enter your email and the temporary password provided.

4 Set your own password

On first login you'll be asked to create a new password. Choose something secure and private to you.

5 You land on the Jury Home

Once signed in you arrive at your jury dashboard and can begin evaluating.

Trouble logging in?

If the temporary password doesn't work or the invitation hasn't arrived, contact the organizing team — they can re-send credentials to your registered email.

3 The Jury Dashboard at a Glance

After signing in you'll see the **Jury Panel**. A navigation menu runs down the left side (on mobile, tap the menu icon at the top). Here's what each item does:

Menu item	What you'll find there
Home	Your overview: counts of Pending, In progress and Submitted evaluations, upcoming deadlines, recent activity and announcements.
Assignments	The problem statements assigned to you, each with its teams grouped underneath. Filter by problem statement and open any team to review.
Evaluate Teams	Your working queue — a flat list of every team you must evaluate. Filter by status and open a team's review screen.
Progress	A completion bar and status breakdown showing how far along you are across all assigned teams.
Announcements	Official messages from organizers relevant to the jury.
Notifications	Personal alerts and updates tied to your account.
Account	Your profile and password settings.

Evaluation window

At the top of Home and the evaluate queue you'll see whether evaluations are **open** or **closed**. You can only enter or change scores while the window is open.

4 Your Assignments & Scope

Open **Assignments** to see the problem statements you're responsible for. Each card shows the problem's organization, department, category (track) and theme (domain), followed by the teams that chose that problem. Use the **problem filter** at the top to focus on one statement at a time.

Every team row shows its current evaluation status and a **Review** button that opens the full evaluation screen.

No assignments showing?

If you don't see any problem statements or teams, organizers may not have attached them to your profile yet. Reach out to the organizing team and they'll assign you.

5 The Evaluation Process, Step by Step

1 Open the Evaluate Teams queue

From the left menu select **Evaluate Teams** to see every team assigned to you.

2 Pick a team and open its review

Click **Open review** on any team to load its full evaluation screen.

3 Study the problem & submission

Read the problem statement and review the team's deck, PDF, demo video and repository links.

4 Score against the rubric

Move each slider to the score you feel the team earned on that criterion.

5 Write your remarks

Add comments for organizers and finalists in the remarks box.

6 Set the team status

Choose **Qualified**, **Waitlist** or **Not Qualified**. This is required.

7 Submit your final evaluation

Click **Submit final**. Your sheet is then locked for that team.

6 Inside the Team Review Screen

The review screen is split into two parts:

Left — The team's work

- **Problem statement** — full details and description.
- **Submission** — buttons and previews for the Deck, PDF, Demo/Video and Repository.
- **Submission timeline** — status, whether the team locked it, and last-updated time.

Right — Your evaluation

- **Rubric sliders** — one per criterion, each with its score range.
- **Remarks** — free-text notes for organizers / finalists.
- **Save draft** and **Submit final** buttons.

Your work is saved as you go

Drafts autosave while you score, and you'll see an "Autosaved" time stamp. You can safely leave and return — nothing is lost until you submit.

7 Scoring, Remarks & Team Status

Rubric scoring

Each criterion has its own slider and maximum. Drag the slider to set your score — the current value shows beside the criterion name (for example **7.5 / 10**). Read the short hint under each criterion to calibrate your judgement. The full Round 2 rubric — seven criteria totalling **100 marks** — is on the **Round 2 Evaluation Criteria** page near the front of this handbook.

Remarks

Use the **Remarks** box to justify your scores and give constructive feedback. These notes help organizers and are valuable to finalists.

Team status — required

Before you can submit, you must set the team's outcome:

Status	Meaning
Qualified	The team advances / meets the bar to proceed.
Waitlist	Borderline — held for consideration depending on capacity.
Not Qualified	The team does not advance at this stage.

Status is mandatory

The

Submit final

button stays disabled until you pick a status. This ensures every evaluated team receives a clear outcome.

8 Drafts, Final Submit & Locking

- **Save draft** keeps your scores and remarks without finalizing — you can come back and edit anytime.
- **Submit final** records your evaluation and **locks your sheet** for that team.
- After submitting you cannot edit unless an organizer reopens your sheet.

Before you finalize

Double-check your slider values, remarks and chosen status. Submit only when you're confident — it's your final word on that team.

9 Tracking Your Progress

Open **Progress** to see a completion percentage and a breakdown of your teams by status (Pending, In progress, Submitted, Locked). Both submitted and locked evaluations count as complete. The **Home** page mirrors these counts so you always know how many teams remain.

10 Frequently Asked Questions

I can't edit a team's scores — why?

Either you've already submitted (your sheet is locked), or the evaluation window is closed. Ask organizers to reopen if you need to make a change.

The Submit button is greyed out.

You haven't set the team status yet. Choose Qualified, Waitlist or Not Qualified at the top of the review screen and the button will enable.

A submission link or preview won't open.

Some teams share Google Drive or external links. Use the labelled buttons (Deck, PDF, Video, Repository) to open them in a new tab. If a preview fails to embed, use the direct link button instead.

I opened a team link and got "Access denied".

Only open teams from your own dashboard. Links to teams outside your assigned scope are intentionally blocked.

Can I change a team's status after submitting?

Not once your sheet is locked. Contact an organizer if a correction is genuinely needed — they can reopen it.

Do I need to evaluate teams in any particular order?

No. Work through your queue in whatever order suits you; the platform tracks each team independently.

Need help?

For anything not covered here — credentials, assignments, reopening a sheet or technical issues — contact the SKH organizing team. They're on hand throughout the evaluation window.
