

SMART KOP HACKATHON 2026

Evaluator & Judge Guide

Round 2 — Prototype Evaluation

Scoring rubric • Dashboard navigation • Step-by-step evaluation process

Prepared for the Jury Panel by the Organizing Committee

Welcome, Evaluator

Thank you for serving on the jury panel for the Smart KOP Hackathon 2026. Your assessment directly determines which teams advance from Round 2. This guide explains **what you will score, how to navigate your evaluation dashboard**, and **the exact steps** to submit a fair, consistent evaluation.

At a glance

7	100
scoring criteria	total marks
3	1
outcome statuses	final submission (locks your sheet)

Before you begin

- Evaluate only the teams shown in your queue — access is scoped to your assigned problem statements.
- Open every submitted artifact (deck, PDF, video, repository) before scoring.
- Your draft saves automatically; the **Submit Final** action locks your sheet from further edits.

Round 2 Evaluation Criteria

Each submission is scored out of **100 marks** across the seven criteria below. Score each criterion on its own merits using the descriptions as your anchor.

#	Criterion	Marks	What to look for
1	Problem Understanding & Relevance	15	Clarity of the problem, target users and relevance to the given problem statement.
2	Innovation & Uniqueness	15	Originality, novelty and differentiation of the proposed solution.
3	Technical Feasibility & Prototype	20	Technical soundness, appropriate technology and functionality/progress of the prototype.
4	Impact & Effectiveness	15	Potential to create measurable social, economic, environmental or industrial impact.
5	Scalability & Sustainability	15	Potential for wider adoption, scalability and long-term sustainability.
6	User-Centricity & Usability	10	Ease of use, accessibility and alignment with the needs of intended users.
7	Completeness & Quality of Submission	10	Quality, clarity and completeness of documentation, supporting evidence and overall presentation.
TOTAL		100	Sum of all criteria

Tip: Technical Feasibility & Prototype carries the highest weight (20). Give the working prototype and its progress proportionate attention.

Scoring bands (guidance)

Band	Range	Interpretation
Excellent	85 - 100%	Exceptional; clearly exceeds expectations and stands out.
Strong	70 - 84%	Solid, well-executed work with minor gaps.
Adequate	50 - 69%	Meets the basics; noticeable room for improvement.
Weak	Below 50%	Significant gaps in this criterion.

Navigating Your Judge Dashboard

After signing in you land on the **Jury Home**. The left sidebar is your primary navigation. It is organised into three groups:

Menu item	Where it goes	What you do there
Home	/judge/home	Snapshot of assigned problem statements and your counts: Pending, In progress, Submitted, Locked. Shows deadlines and recent activity.
Assignments	/judge/assignments	Your problem statements with the teams grouped under each. Filter by a specific problem statement.
Evaluate Teams	/judge/evaluate	Your evaluation queue. Filter by status (All / Pending / In progress / Submitted / Locked) and open a team's review.
Progress	/judge/progress	Track how many of your assigned evaluations are complete versus outstanding.
Announcements	/judge/announcements	Official notices from the organizing committee for the jury.
Notifications	/judge/notifications	Personal alerts, e.g. when an organizer reopens a sheet for you.
Account	/judge/account	Manage your profile and password.

Security note

Your queue only lists teams within your scope. Editing a URL to open a team outside your assignment returns **Access denied** — always open teams from your dashboard.

Inside the Team Review Screen

Opening a team from the queue (</judge/evaluate/<team>>) shows everything you need in one place:

- **Problem statement** — title, organization, department, category, theme and full description.
- **Submission** — quick links and embedded previews for the Deck, PDF, Demo/Video and Repository.
- **Submission timeline** — status, whether the team locked it, last updated and finalized times.
- **Rubric & remarks** (right panel) — a slider for each criterion, a remarks box, the team-status buttons, and the Save / Submit actions.

How to Evaluate: Step by Step

- 1 Open your queue**
Sidebar → **Evaluate Teams**. Pick a team with status *Pending* or *In progress*.
- 2 Study the submission**
Open the deck, PDF, video and repository. Read the problem statement in full.
- 3 Score every criterion**
Move each slider (0 to its maximum). All seven criteria must reflect your honest judgement.
- 4 Write remarks**
Add concise, constructive remarks for the organizers and finalists.
- 5 Set the team status**
Choose **Qualified**, **Waitlist** or **Not Qualified**. This is required to submit.
- 6 Submit final**
Click **Submit Final**. Your sheet locks; drafts saved along the way are replaced by the final.

Remember

Drafts autosave as you work, so you can pause and return.

You cannot edit after submitting — if you need to, ask an organizer to reopen your sheet.

If the phase is closed, the screen is read-only and scores cannot be saved.

Evaluation Process Flow

The end-to-end path from sign-in to a locked, submitted evaluation:

Questions during evaluation? Contact the Organizing Committee through the channel provided in your jury onboarding email. Thank you for helping us run a fair and rigorous Round 2.
